

Manish Jha

Pune, Mumbai, India | +91-9653219864 | mjha31018@gmail.com | [LinkedIn](#) | [Github](#)

OBJECTIVE

B.Tech graduate in Computer Science Engineering (AI & ML) with practical experience in AI/ML, LLMs, RAG, backend development, and automation workflows. Seeking an AI Engineer role where I can contribute to real-world AI applications while expanding my expertise in Machine Learning and Generative AI.

Education

Bachelor of Technology (B.Tech) – Computer Science Engineering (AI & ML)
D Y Patil University, Ambi, Pune
2022 – 2026 | CGPA: **8.95**

SKILLS

Languages: Python, SQL, C++, C
Frameworks & Libraries: Django, React, Scikit-learn, OpenCV, Pandas, NumPy
Machine Learning: Model Training, Regression, Feature Engineering, Model Evaluation, Data Preprocessing
AI/LLM: LangChain, RAG, Vector Databases (FAISS), Embeddings, Prompt Engineering
Tools & Platforms: Git, GitHub, Streamlit, REST APIs, Postman, Docker, FastAPI
Core Concepts: Data Structures & Algorithms, OOPs, DBMS
LLM Evaluation: Prompt Testing, Response Evaluation, Reasoning Validation
Backend Development: Django, REST APIs, Authentication, API Integration, PostgreSQL

PROJECTS

CredIntel — AI Credit Risk Decision Engine ([Live](#))

- Built an end-to-end AI system combining Machine Learning, NLP, and LLMs (RAG) for credit risk evaluation
- Developed automated financial data extraction from PDFs and implemented ML-based borrower risk scoring
- Integrated real-time web research + sentiment analysis to enhance decision insights
- Designed LLM-powered Credit Appraisal Memo (CAM) generator simulating real banking workflows
- Deployed an interactive Streamlit dashboard enabling real-time credit risk analysis and decision support

HealthGuardAI

- Built an ML-based system for automated insurance claim validation and anomaly detection
- Designed secure access control and audit mechanisms for sensitive healthcare data

GenAI-Based Financial Assistant

- Developed a full-stack financial platform using React, Django, PostgreSQL, and Celery
- Processed financial data using Python & SQL and generated insights dashboards

Chronic Kidney Disease Prediction

- Built an ML classification model using Scikit-learn for early disease detection
- Performed preprocessing, feature engineering, and model optimization

ACHIEVEMENTS

- Selected for Google Cloud Innovator Program (Cloud & AI track)
- Active Member – Google Developer Program & Google Cloud x NVIDIA Developer Community
- Participant – Google I/O 2026 (AI & Developer Ecosystem)
- Top 10 Finalist – University-Level Ideathon (out of 100+ teams)
- Certified by ISRO IIRS – Remote Sensing & Image Analysis
- Contributed to logistics system design for an e-commerce platform (YaarIdeal)
